

Really THICK Stainless Steel Shims

These Really THICK Stainless Steel shims are NOT marked with a nominal thickness – they are permanently etched with the exact thickness to the nearest thousandth for better alignment accuracy. All shims use the tab design which provides safe handling and makes tying packs for re-use a snap (a thick snap in this case)!

All of our Really THICK shims are available in 1/4", 3/8" and 1/2" THICKnesses! The standard shim sizes are "AA", "A", "BB", "B", "C" and "D" with custom shims available.
